

Teacher: L. George	Week: Jan 2-6
Subject: 7th Science	Q3 Week 1

GLE 7.7.7.4 Explain how earthquakes, mountain building, volcanoes, and sea floor spreading are associated with movements of the earth's major plates
 SPI 7.7.7.5 Recognize that lithospheric plates on the scale of continents and oceans continually move at rates of centimeters per year

Monday	Tuesday	Wednesday	Thursday	Friday
Objective - NO SCHOOL	Objective - explain how earthquakes are caused by buildup of strain in earth's crust -compare and contrast primary, secondary, and surface waves -recognize earthquake hazards and how to prepare for them	Objective - explain how earthquakes are caused by buildup of strain in earth's crust -recognize earthquake hazards and how to prepare for them -explain how volcanoes can affect people -compare how 3 volcano forms develop	Objective - explain how earthquakes are caused by buildup of strain in earth's crust -recognize earthquake hazards and how to prepare for them -explain how volcanoes can affect people -compare how 3 volcano forms develop	Objective - explain how earthquakes are caused by buildup of strain in earth's crust -recognize earthquake hazards and how to prepare for them -explain how volcanoes can affect people -compare how 3 volcano forms develop
Learning Activities -	Learning Activities -review rules for class -vocabulary words for section 1 and 2	Learning Activities -power point earthquakes and volcanoes -guided notes	Learning Activities - finish notes -WS Types of Faults and Earthquakes and volcanoes	Learning Activities -lab: a model of three faults
Assignments -	Assignments <ul style="list-style-type: none"> Homework: finish words 	Assignments <ul style="list-style-type: none"> Read over notes 	Assignments <ul style="list-style-type: none"> -finish WS for homework -read over notes 	Assignments <ul style="list-style-type: none"> Finish lab for homework Read over notes
