

Teacher: L. George	Week: Feb 20-24
Subject: 7th Science	Q3 Week 8

GLE 0707.3.1 Distinguish between the basic features of photosynthesis and respiration; 0707.4.2 Demonstrate an understanding of sexual reproduction in flowering plants; GLE 0707.3.2 Investigate the exchange of oxygen and carbon dioxide between living things and the environment

Monday	Tuesday	Wednesday	Thursday	Friday
Objective <ul style="list-style-type: none"> - Identify characteristics common to all plants - Identify the characteristics of seed plants 	Objective <ul style="list-style-type: none"> - Identify the characteristics of seed plants - Explain difference between angiosperms and gymnosperms 	Objective <ul style="list-style-type: none"> - explain why mitosis is important - list 2 examples of asexual reproduction - examine the steps of mitosis 	Objective <ul style="list-style-type: none"> - explain why mitosis is important - list 2 examples of asexual reproduction - examine the steps of mitosis 	Objective <ul style="list-style-type: none"> - explain why mitosis is important - list 2 examples of asexual reproduction - examine the steps of mitosis
Learning Activities -finish photosynthesis project -ch 4 voc p. 102 plus WS on flowers	Learning Activities -WS plants finish WS on flowers	Learning Activities -ch 6 voc p. 174 -review plants	Learning Activities <ul style="list-style-type: none"> • notes cell cycle • quiz on plants 	Learning Activities <ul style="list-style-type: none"> - finish notes - draw label color steps of mitosis
Assignments <ul style="list-style-type: none"> • Read over notes 	Assignments <ul style="list-style-type: none"> • Read over notes 	Assignments <ul style="list-style-type: none"> • Study for quiz 	Assignments -read over notes	Assignments <ul style="list-style-type: none"> • Finish drawing
